

# A THERAPY YOU CAN TRUST

## LASER THERAPY IS...

- + Safe
- + Non-invasive
- + Pain-free treatments
- + A drug-free treatment alternative
- + Less stressful for your pet than other treatments
- + Often soothing for your pet

## LASER THERAPY IS USED TO...

- + Reduce pain and discomfort
- + Speed healing
- + Increase mobility and motion in joints
- + Reduce swelling

## HOW DOES LASER THERAPY WORK?

- + Photons of laser light penetrate deep into tissue
- + These photons are absorbed into the cells which initiates a photo-chemical response
- + This response in the cells blocks nerve impulses, accelerates tissue repair, increases circulation, and reduces swelling

## WHICH PETS BENEFIT FROM LASER THERAPY?

- + If your pet is in pain, has, inflammation, or has a wound, laser therapy can be beneficial
- + This includes patients that have the aches and pains of arthritis, who have just had a surgical procedure, or who have an open wound or recent injury

## LASER THERAPY CAN BE USED FOR...

- + **Arthritis**, no matter how chronic or severe
- + **Wounds** including bites, burns, scrapes, and cuts
- + **Hip Dysplasia** and degenerative Joint Disease (DJD) or other joint conditions
- + **Speed up** healing and reduce pain and inflammation after surgeries including spays, neuters, declaws, tumor removal, and emergency cases
- + **Dental Procedures**
- + **Ear infections**
- + **Skin infections**
- + **Sprains, strains, and fractures**

Message from Marty Minor, silver tabby cat:

"Laser therapy has made a big difference in my mobility and quality of life. Before treatment, I would sit on the couch for hours, getting up only to eat, drink and use the litter box. My owners noticed a change from the very first appointment. Now I can groom myself easier too. I feel great for being 19 years old since I started laser therapy at BCPH. It has really helped me manage arthritis in my back. My family is so happy with the results!"

Testimonial by Susan, Marty's mom
